WORK HISTORY

PROJXON - Web Developer
Remote · Mar 2025-Current
- Developed responsive, cross-browser compatible websites using React, Next.js and headless WordPress.
- Enhanced user experience by implementing responsive web design and optimizing website performance.
- Contributed to agile sprints and participated in weekly meetings, resulting in improved team collaboration and project delivery timelines.

DataAnnotation - AI Trainer
Remote · May 2024-Current
- Trained and optimized chatbot models using Python, JavaScript, and C++, improving response accuracy and user engagement.
- Created structured datasets (CSV, JSON, XML) for AI response evaluation, enhancing data analysis and model performance.
- Rated and refined model outputs for accuracy and coherence, ensuring high-quality AI interactions and user satisfaction.

Lakehead Public School Board - Work Placement
Thunder Bay, ON · Mar 2019-May 2019
- Designed and implemented around 5 custom WordPress themes for school websites.
- Integrated plugins into websites to enhance site usability and functionality.
- Created JasperSoft reports to enhance the streamline reporting process.

PROJECTS

Trail Map Report - WordPress Developer | Jul 2025
WordPress | Node.js | jQuery | SASS/SCSS | AWS EC2
- Created a simple WordPress site where users can set trails as either open or closed and deployed site on EC2-trailmapreport.simeondavenport.com.
- Used Contact Form 7 for form and enhanced styling and JavaScript using jQuery and SCSS.
- Streamlined development and enhanced responsiveness using NPM packages for tooltip shrinking with area map and concurrent scripts running.

Zephyr Aero Leather - Full Stack Developer | Mar 2024-Jun 2024
Next.js | React | Tailwind | TypeScript | WordPress | WooCommerce | Stripe
- Worked on the front end and back end of an e-commerce site for PROJXON-zephyraeroleather.com.
- Integrated Stripe payment and fully synced site to a headless WooCommerce.
- Added various features to enhance functionality including an order history page.

PROJXON Website - Front End Developer | Mar-May 2025
Next.js | React | Tailwind | Bootstrap | WordPress | TypeScript | AWS EC2
- Migrated site from vanilla React to Next.js to improve SEO, and later from JavaScript to TypeScript for type safety.
- Enhanced site performance by implementing SSR, SSG and ISR on front-end.
- Deployed live site-www.projxon.com-using AWS EC2 and maintained redeployment with new changes.

CERTIFICATIONS

- **Ultimate AWS Certified Developer** - In progress
